L'etnite porta in casa tua la forza, l'energia e la potenza dell'etna; lasciati trasportare dai suoi colori, dalla sua morbidezza in un mondo di nuove sensazioni ed emozioni.

L'etnite nasce dalla sintesi tra l'ingegno umano e la forza prorompente della natura.

Il suo fascino emana dalla sua consistenza: l'etnite è una pietra a tutti gli effetti: i mastri scalpellini, nei soli cinque mesi all'anno che lo rendono possibile, selezionano le parti più fini e raffinate delle colate per estrarvi i cosiddetti cristalli di lava; la sua duttilità consente alla nostra creatività, unita alla tecnologia più all'avanguardia, di lavorarla nei modi più diversi e di creare prodotti unici e innovativi, che mettono in risalto le sue peculiari caratteristiche:

- * antiscivolo
- * drenante
- * completamente naturale
- * colori unici provenienti dalla terra
- * tatto inconfondibile
- * tutte le forme possibili realizzabili
- * antibatterico
- * resistente agli urti
